

PLATINUM ENHANCED KARAT GOLD GRAIN

ABI Metals has developed a proprietary family of Karat Gold alloys enhanced with Platinum to increase the hardness of the metal. The added hardness improves the strength and scratch resistance of the Karat Gold. The small addition of Platinum also increases the brightness of the metal.

STANDARD BLENDS AVAILABLE:

KARAT	STANDARD HARDNESS AS CAST	PT/AU HARDNESS AS CAST	PT/AU HARDNESS HEAT TREATED	COST PREMIUM OVER STD.KARAT
14K	140V	164V	254V	1.7% (\$12.00/OZ)
18K	125V	145V	200V	1.0 (\$10.00/OZ)
22K	60V	77V	83V	.2% (\$2.00/OZ)

The addition of the Platinum also creates a branding opportunity to promote a premium Karat Gold with more perceived value in the minds of the consumer.
