

950 Elite Sterling

With Exceptional Tarnish Resistance

ABI introduces our new line of premium sterling (95% silver) casting grain with extremely high tarnish resistance that eliminates the need for rhodium plating.

Benefits include the following:

- Bright white color
- High tarnish resistance (9 times greater than Sterling)
- Good castability – better than sterling (enhanced metal flow, reduced porosity, no firescale)
- Increased hardness provides greater durability/strength (85V)
- Ideal for designer lines at affordable price point (excellent white gold alternative)
- Suitable for hand fabricated product (sheet and wire)

Grain Pricing:

950-3P

Silver Content (.952 + 2%)	\$14.57/oz
