

ALLURAGOLD™

“The Karat Gold Alternative”

ABI offers a family of patented low gold and palladium alloys that provides the jewelry manufacturer a low cost alternative to the current high prices of karat gold products. **Alluragold** alloys create an opportunity to develop a new product line at a fraction of the cost of karat gold to expand your jewelry line appeal to more customers.

ALLURAGOLD™ offers the following benefits:

- Perceived Value at 65 to 90% lower cost than 14K Gold
- Colors similar to white and yellow karat Gold
- Increased hardness and durability
- Excellent tarnish resistance similar to 10K Gold

STANDARD ALLOYS

| Alloy # | Composition | Comment |
|---------------|-----------------------------|---|
| Yellow | | |
| 7650 | 5% Gold Alloy | 14K yellow color / medium tarnish resistance |
