

ABI Manufacturing International

“ HIGH QUALITY JEWELRY ALLOY PRODUCTS”

September 2023

BRASS/BRONZE ALLOYS: The costume jewelry market around the world continues to grow as customers seek more affordable fashion jewelry. Our high quality alloys can also meet your “Green” specifications with superior casting performance. ABI can custom design the alloy to meet your specific needs . Call us today for a free sample.

STERILITE PATENTED STERLING DE-OX ALLOY: ABI offers a variety of sterling de-ox alloy that offers superior casting quality, bright white color, and high tarnish resistance. A variety of hardness levels are available. Ask our technical team to determine the best alloy for your needs. We have patented strong spring wire alloy to meet your needs for thin light weight sterling bracelets.

PLATINUM STERLING: our patented 1%, 3.5% and 5% platinum sterling has a bright white color, increased hardness, and excellent tarnish resistance along with a high perceived value that is ideal for branding a design line.

CLEAN SCRAP RECYCLING PROGRAM : Has developed a proprietary brass , Sterling silver , and colored silver clean scrap recycling program that enables customers to recycle clean old trees and buttons and eliminate the need to scrap the metals. The program results in a significant cost savings. Call us today for quote.

NICKEL FREE WHITE GOLD ALLOY: New #850 Nickel Free white gold alloy for 10K and 14K applications. The high silver formula has excellent casting properties at a fraction of the cost of Palladium based alloys. The alloy meets all nickel release requirements of the European Union

Quality, Technical Support, Fast Delivery: Our state-of-the-art facility in Bangkok, Thailand manufactures high quality alloys at competitive pricing with fast delivery. Most alloys are stocked for immediate delivery, and the recent Asian trade agreement with Thailand allows us to deliver alloys to most countries duty free.

**ABI TECHNICAL AND
SUPPORT TEAM**

ABI takes pride in providing superior technical support in the casting and finishing on all our alloys. Our high quality alloys will only perform at their best if proper casting and spruing techniques are followed. Most alloy casting problem are process related. Our expert staff can diagnose these problems and improve your product quality. Also, our in house casting lab enables us to custom engineer alloys to meet your needs.
